

# Bibliography

This short bibliography is restricted to books related to the main themes of this book, work and vocational consultancy. It is a guide to authors whose approaches to consultancy are similar to or which resonate with or illuminate the approach described in this book. In one way or another they have helped me to understand, form and develop my own approach. They could help readers to do the same as they formulate their own practice theory.

Books marked with an \* contain case study material.
